Natura Onecoat

WOOD SOAP

Description: Universal Soap is a concentrated, natural cleaner specifically developed for the regular cleaning and maintenance of wood surfaces treated with oil finishes. The formula effectively removes dirt and grease without damaging the protective oil layer, maintaining the wood's natural appearance and matte finish.

Color: Transparent (Yellowish green liquid)

General Features:

Gentle cleaning action suitable for all oiled wood surfaces.

Does not damage or dull the protective oil layer.

Biodegradable and environmentally friendly.

Leaves no residue after rinsing.

Suitable for both domestic and professional use.

Can also be used on laminate, tile, or vinyl surfaces treated with oil.

Packaging: 100 ml, 1 L

Tecnical Specifications:

Physical form	:	Yellowish green liquid
Density	:	±1.00 g/cm³ ISO 2811
VOC (2004/42/CE,1999/13/CE)	:	0 g/l
pH Value	:	8 – 9 ISO 10523
Dilution Ratio	:	1/100 (100 ml per 10 L of water)
Odor	:	Lime fragnance
Shelf life (5-35°C)	:	1 year for unopened can

Surface Preparation:

Ensure the surface is free from loose dust and debris.

For heavily soiled areas, remove dry contaminants before wet cleaning.

Application:

Dilute 100 ml of Natura Wood Soap in 10 L of clean, preferably soft, water.

Apply the mixture and clean the surface using a damp mop, cloth, or microfiber pad.

Rinse or wring the mop frequently during cleaning.

Allow the surface to dry completely before use.

For heavily soiled areas, increase the concentration slightly or repeat the cleaning process.

Tip: Routine cleaning with Natura Wood Soap helps preserve the oiled wood finish and keeps the surface looking fresh and well-protected.

Safety Precautions:

Keep out of reach of children.

Avoid contact with eyes and prolonged skin contact.

In case of eye contact, rinse immediately with plenty of water.

Do not mix with other cleaning agents.

Consult the Safety Data Sheet (SDS) for detailed safety and first-aid information.
